Salman Abu Hassan

Fourth-year computer science student will be having to undergo internship in June or July 2020 at the end of my semester
Banting, Selangor, Malaysia

Summary

I am someone who was fascinated and curious about many things in general. Due to this nature, I didn't pick any specialization in my study and take many interesting subjects ranging from Blockchain, Machine learning, Network Security, Cryptography and many more. I participated in programming competitions of ICPC at the national level and managed to qualify for the regional and although I didn't win, I feel my programming skill has improved a lot due to this. I also join KPMG Cyber Challenge and gain good exposure to the cybersecurity field in general. I am interested in doing software development and cybersecurity in general.

Experience

IIUM Advanced Tehcnologies
Information Technology Technician
August 2018 - December 2018 (5 months)
Malaysia

Part-time in UTM Project where the job scope includes assembling PC for UTM facilities and installing and updating the PC to the latest version of windows. Also, doing a maintenance job for PC leasing in IIUM Celpad and KICT Faculty.
